

# LEARNING PATHS

## ECONOMICS AND FINANCE

We all have financial goals and achieving them requires a solid understanding of how money works. With this series of finance and economics courses, you can discover what it takes to navigate volatile markets, understand the impact of the global economy, and learn how to cope with uncertainty—all of which can help you avoid expensive mistakes.

### CORE COURSES

Get to know everything from the basics of how the stock market works to how the latest investment and financial news can impact your long-term goals with three courses that provide a fundamental introduction to finance.

- [Money Management Skills](#)
- [An Economic History of the World since 1400](#)
- [Thinking like an Economist: A Guide to Rational Decision Making](#)

### ELECTIVES: World Economics (Choose 2)

Examine how national and international monetary policies shape banking by selecting two courses that dive into a global approach to economics.
